ANNOUNCEMENTS OF COURSES AND FACULTY
FOR 1923 AND 1924

1923

PRESIDENT'S RESIDENCE

APPLICATION FOR ADMISSION

....., 192.....
Post Office Date
REGISTRAR, KENTUCKY NORMAL AND INDUSTRIAL INSTITUTE,
Frankfort, Kentucky.

I hereby apply for admission as a student in the K. N. & I. I
My training is as follows:

Common School
High School
College

The following persons know of my character, academic attainment
and my natural fitness:

Name Post Office

Name Post Office

Name Post Office

Name of Applicant Age Post Office

HEALTH CERTIFICATE

I hereby certify that.....
is of general good health and has no infectious or contagious disease.
Special care was observed by me to determine this applicant's free-
dom from tubercular trouble which might be communicated to others.

....., M. D.

....., Post Office

Date.....

BOARD OF TRUSTEES

HON. GEORGE COLVIN, LL. D., Ex Officio,
Superintendent of Public Instruction,
FRANKFORT.

DR. F. C. BUTTON,
MOREHEAD

HON. D. O. BURKE,
BRADFORDSVILLE.

MR. JOHN C. MASTIN,
FRANKFORT.

PRESIDENT F. M. WOOD, A. M., Ex Officio,
FRANKFORT.

FACULTY 1923 AND 1924

ADMINISTRATION

F. M. WOOD, A. M., PRESIDENT
Educational Administration and Management

....., DEAN

J. H. INGRAM,
Business Manager

MISS R. MINTA MORELAND,
Stenographer

MISS J. FRANCES GREEN,
Secretary to the Dean

INSTRUCTION

ENGLISH

Robt. G. Fletcher, A. B., Fisk University, High School and College English
Mrs. Georgia R. Watson, B. S., Clark University, English, Penmanship and Drawing
J. A. Bond, A. B., Knoxville College, High School English and Psychology

MATHEMATICS

H. A. Kean, A. B., Fisk University, High School and College Mathematics
J. S. Estill, B. L., Berea College, Mathematics

SCIENCE

L. P. Woodson, B. S., Wilberforce University, Physics and Chemistry
F. A. Taylor, B. S., Howard University, Physiology, Hygiene and Nature Study

LATIN AND FRENCH

Miss Sallie F. Ellison, A. B., Fisk University, Latin and French

HISTORY AND GEOGRAPHY

P. W. L. Jones, A. B., K. N. & I. I., Simmons University, University of Pennsylvania, European History, Economics, Negro History
Miss Edith Martin, A. B., Howard University, Geography and U. S. History

AGRICULTURE

Robt. S. Blythe, K. N. & I. I., High School Agriculture
J. Leonard Miller, New York Agricultural College, High School and Junior College Agriculture
Solomon Dean, K. N. & I. I., Superintendent of Farm

HOME ECONOMICS

Mrs. Zulema B. Smith, B. S., Hampton Institute, High School and Junior College Cooking
Miss Alice K. Mundy, Pratt Institute, High School and Junior College Sewing

TRADES

John T. Thornton, Hampton Institute, Carpentry and Drawing
A. D. Lomax, Tuskegee Institute, Furniture Repairing
Clyde DeHuguley, Tuskegee Institute, Shoe Repairing

MUSIC

Miss Iola M. Jordon, Louisville School Music, Public School Music

PHYSICAL EDUCATION

D. B. Evans, A. B., Lincoln University, Physical Education and Hygiene

OPPORTUNITY CLASSES Seventh and Eighth Grades

G. W. Adams, Opportunity Classes and Supervisor of Boys' Dormitory

CRITIC TEACHERS

Miss Annie Banks, K. N. & I. I. and Hampton Institute, First and Second Grades

Miss Eva C. Jones, K. N. & I. I. and Hampton Institute, Third, Fourth and Fifth Grades

Miss Laura F. Chase, K. N. & I. I. and Hampton Institute, Sixth, Seventh and Eighth Grades

PROFESSIONAL AND EXTENSION WORK

J. L. White, Hampton Institute, Smith-Hughes Agriculture, Teacher Trainer

Miss Roberta P. Walker, Fisk University, Smith-Hughes, Home Economics, Teacher Trainer

....., Supervisor of Practice

Miss Beatrice Ware, Stenographer of Extension Department

Edward E. Underwood, M. D., Medical Inspector, Inspection and Lecturer on Hygiene and Sanitation

OPERATION AND MAINTENANCE OF PLANT

James Jordon, Instructor in Steam and Electrical Engineering

Charles Slaughter, Assistant Engineer

Mrs. S. D. Harrison, Stewardess

Mrs. Ella Harreld, Matron

Lloyd Graves, Superintendent of Buildings and Grounds

CALENDAR

1923

Boarding Department opens Monday.....September 10
First Semester begins Tuesday.....September 11
Thanksgiving Holiday, Thursday.....November 29
Close for Christmas Holidays, Friday.....December 21

1924

Classes Resume Wednesday.....January 2
First Semester Examinations.....January 16, 17 and 18
Second Semester begins Monday.....January 21
Washington's Birthday, Friday.....February 22
Teachers' Review Class begins Monday.....March 3
Senior Class Examinations.....May 14, 15 and 16
Closing Exercises, Model School, Wednesday, 8 p. m.....May 21
Annual Musical, Friday, 8:00 p. m.....May 23
General Examinations.....May 28, 29 and 30
Baccalaureate Sermon, Sunday, 3:00 p. m.....June 1
Exercises, Religious Societies, Sunday eve, 8:00.....June 1
Exercises, Literary Societies, Monday eve, 8:00.....June 2
Exercises, Alumni Association, Tuesday eve, 8:00.....June 3
Commencement Day, Wednesday, 10:00 a. m.....June 4

DAILY SCHEDULE

Rising Bell	5:30 a. m.
Breakfast	7:00 a. m.
Study	7:30 to 8:30 a. m.
Recitations.....	8:30 to 9:15 a. m.
	9:15 to 10:00 a. m.
	10:00 to 10:45 a. m.
	10:45 to 11:30 a. m.
Chapel Exercises	11:30 to 12:00 m.
Noon Recess	12:00 to 1:15 p. m.
Recitations.....	1:15 to 2:00 p. m.
	2:00 to 2:45 p. m.
	2:45 to 3:30 p. m.
	3:30 to 4:15 p. m.
Manual Labor	4:15 to 5:15 p. m.
Supper	5:30 to 6:00 p. m.
Recreation	6:00 to 7:00 p. m.
Study	7:00 to 9:45 p. m.
Retire	10:00 p. m.

ACADEMIC BUILDING

MEMORANDUM REORGANIZATION OF THE KENTUCKY NORMAL AND INDUSTRIAL INSTITUTE

In the proposed reorganization of the Kentucky Normal and Industrial Institute, the work of this school has been conceived:

- (1) To provide colored youth with an opportunity to obtain a general high school education and a general college education through the junior year.
- (2) To offer colored youth opportunities for practical and industrial training within the high school field, and
- (3) To offer colored youth opportunities to prepare to teach in the colored schools of the State.

The difference between the organization as it now exists and as proposed is best seen by comparing the courses of study now offered and those that it is proposed to offer.

OLD COURSES

- (1) Intermediate course (7th and 8th grades).
- (2) Academic High School Course.
- (3) Teachers' Courses, Normal Department.*
- (4) Agricultural Courses for Teachers of Agriculture.
- (5) Home Economics Course for Teachers of Home Economics.
- (6) Electric Engineering.
- (7) Business Course.
- (8) Trade Courses.

PROPOSED COURSES

- (1) Opportunity Classes (7th and 8th grades).
- (2) Academic High School Course.
- (3) Agricultural High School Course (Smith-Hughes.)
- (4) High School Trade Courses (Smith-Hughes).
 - a. Carpentry.
 - b. Furniture Repairing.
 - c. Shoe Repairing.
 - d. Home Making (in connection with Academic High School Course).

*This last year an elementary certificate course and an intermediate certificate course were offered but not given.

OLD COURSES

- a. Furniture Repairing.
- b. Shoe Repairing.
- c. Clothing Repairing.
- d. Dressmaking.

PROPOSED COURSES

- (5) †Teacher Training Courses.
 - a. Elementary Certificate Course.
 - b. Intermediate Certificate Course.
 - c. Advanced Certificate Course.
 - d. High School Teacher Training Course.
 - e. Course for Teachers of Home Economics.
 - f. Course for Teachers of Agriculture.
- (6) Junior College Course.

The proposed reorganization includes. it will be noted, a junior college course.

An important difference is also to be noted in the trade courses. Under the old organization vocational work, such as agriculture, home economics, to say nothing of the trades, began in the fourth year of the high school. In the proposed courses, vocational training is begun in the first year of the high school and continues throughout the high school period. No trade training of a college grade is offered.

Under the old organization, teacher training was practically limited to students of a high school grade. Under the proposed reorganization, teacher training extends throughout the high school period. An Elementary Certificate Course is prepared which covers the first two high school years, and designed to train teachers to teach in one-teacher schools. For the training of graded school teachers an Intermediate Certificate Course is provided that covers the third and fourth year of high school and an Advanced Certificate Course which covers the first and second college years. By emphasizing teacher training work on the high school level, we believe this school will be able to do much more than heretofore for the colored schools of the State.

It should also be noted that the courses for the training of

†Transition courses have been outlined for students who have completed the Elementary Certificate Course and want to complete the Intermediate Certificate Course, and also for students who have completed the Intermediate Certificate Course and want to complete the Advanced Certificate Course, but these two transition courses are not included here.

high school teachers are added. The introduction of the junior college course makes this possible.

The difference between the number of teachers required to carry out the work of the school under the old organization and under the new may be set forth as follows:

	Teachers Old Courses	Teachers New Courses
English	1	2½
Mathematics	1	2½
Science	1	2
Geography and History	1	2
Latin	1	1
Domestic Science	2	2
Agriculture	1	2
Carpentry	1	2
Furniture Repairing	1	1
Shoe Repairing	1	1
Music	1	1
Drawing	0	1
Physical Education	1	1
Critic Teachers	2	2
PROFESSIONAL		
Smith-Hughes Home Economics..	1	1
Smith-Hughes Agriculture	1	1
Supervisor of Practice	0	1
Secondary Education	½ Dean	½ Dean
Total	18½	27½

The new courses call for an addition of nine teachers. These additions are in two main fields—the academic and the professional. Under the old organization there were only seven teachers to carry on all the academic work. Under the proposed reorganization there will be seventeen. Whereas, under the old organization there were only 21½ teachers devoting their time to teacher training, under the new organization there will be 41½. This increase in academic and professional force cannot help but materially strengthen this school.

These courses of study and the reorganization plan have been carefully gone over by Superintendent of Public Instruction, Dr. Geo. Colvin, Dr. Frank P. Backman, Mr. Jackson Davis,

Dr. J. W. Carr, Mr. Chas. D. Lewis, Mr. J. Irvan Barnes, Dr. P. C. Button and represent the best judgment of these experts in the various fields indicated in this catalogue.

These courses and plan have been approved by principals of the leading schools of the state.

TEACHERS' COURSES.

Three different courses are maintained for the training of regular teachers: (a) Elementary Certificate Course; (b) Intermediate Certificate Course; and (c) Advanced Certificate Course.

ELEMENTARY CERTIFICATE COURSE.

The elementary certificate course is two years in length. To enter it, the student must be sixteen years of age and have completed the eighth grade of the common school. Students completing this course will be granted an elementary certificate good for two years in any public school. As students in this course will teach in one-room schools, the work of this course is so organized and so adapted as to prepare for teaching in one-teacher schools.

INTERMEDIATE CERTIFICATE COURSE.

The intermediate certificate course is two years in length. To enter it, students must have finished (a) the elementary certificate course, in which case the work of the student will be adjusted so that needless duplication will be avoided; or (b) completed two years of standard high school work. Students who finish this course will be granted an intermediate elementary certificate good for four years in any public school. As students in this course will probably teach in graded schools, this course is so organized and is so adapted as to prepare for teaching in graded schools.

ADVANCED CERTIFICATE COURSE.

The advanced certificate course is two years in length. To enter it, a student must have finished (a) the intermediate certificate course, in which case the work of the student will be adjusted so that needless duplication will be avoided; or (b) completed a four year course in an "accredited" high school. As students in this course will probably teach in graded schools, this course is so organized and so adapted as to prepare for teaching in graded schools.

TEACHERS' COURSE IN AGRICULTURE.

The teachers' course in agriculture is designed to prepare teachers to teach agriculture in both elementary schools and high schools. To enter it, students must have completed a four year course in an "accredited" high school, specializing in agriculture. Those who complete this course are granted a special teacher's certificate in agriculture good in any public elementary or high school.

*Students who have completed the Intermediate Certificate Course and wish to become high school teachers should take the High School Teachers' Course.

†These are the regular junior college courses in these studies.

TEACHERS' COURSE IN HOME ECONOMICS.

The teachers' course in home economics is designed to prepare teachers to teach home economics in both elementary schools and high schools. To enter it, students must have completed a four year course in an accredited high school and have had as a part thereof two years' work in home economics. Those who complete this course are granted a special teacher's certificate in home economics valid in any public elementary school or high school.

JUNIOR COLLEGE COURSE.

It is the intention of those in authority to provide as soon as funds are available full four-year college courses. For the present, however, no course will be continued beyond the second college year. The junior college course is maintained for those students who desire a liberal education but who are not preparing for a definite vocation.

COURSE OF STUDY.

The junior college course is two years in length, and is designed to give students the first two years of a standard four-year college course. To enter this course, students must have completed a four-year course in an "accredited" high school or its equivalent.

SUBJECT COURSES IN DIFFERENT CERTIFICATE COURSES.

The same subjects appear in the different teacher training courses, also the aims and purposes of the different courses in the same subject; for example, arithmetic remains the same throughout, nevertheless the instruction in the same subject will differ with the course. To illustrate: arithmetic appears in the first year of the elementary certificate course and in the first year of the advanced certificate course. Clearly the work in arithmetic in the latter course with high school graduates can be both more intensive and extensive than in arithmetic in the elementary certificate course with ninth grade pupils. Unless these differences are kept clearly in mind, much of the value of these different courses in the same subject will be lost. The differences that shall be constantly kept in mind are embodied in part in the following:

ARITHMETIC.

Arithmetic (1).—Arithmetic (1) is given in the first year of the trade courses and runs through two semesters. The aim of this course is to give students taking trade courses a thorough grasp of the principles of arithmetic and the application of these principles to the several trades.

Arithmetic (2).—Arithmetic (2) runs throughout the first year of the elementary certificate course. The object of this course is to give prospective teachers insight into the fundamental principles of arithmetic and their application to arithmetical problems in every day life. It also seeks to develop skill in the analysis of arithmetical problems, in the explanation of the operations involved, and in the solution of problems.

Arithmetic (3).—Arithmetic (3) is given in the first semester of the second year of the elementary certificate course. The object of this course is to give prospective teachers a knowledge of the arithmetical materials and operations involved in teaching arithmetic in one-teacher schools; also a knowledge of methods, including observation, of teaching arithmetic in such schools.

Arithmetic (4).—Arithmetic (4) is given in the first semester in the first year of the intermediate certificate course. The ob-

ject of this course is the same as in Arithmetic (2), but the work is pitched upon a higher level, and arithmetic is taught particularly in view of Algebra and Geometry.

Arithmetic (5).—Arithmetic (5) is given in the second semester of the first year of the intermediate certificate course. It aims to give prospective teachers a knowledge of the arithmetical materials involved in teaching arithmetic in graded schools; also a knowledge of the methods, including observation of the teaching of arithmetic in such schools.

Arithmetic (6).—Arithmetic (6) is given in the first semester of the first year of the advanced certificate course. The aims and purposes of this course are the same as in Arithmetic (2), and Arithmetic (4), but it is taught upon a still higher level than Arithmetic (4) and in the light of the student's knowledge of Algebra and Geometry.

Arithmetic (7).—Arithmetic (7) is given in the second semester of the first year of the advanced certificate course. The aims and purposes of this course are the same as those of Arithmetic (5), but it is taught upon a higher level than Arithmetic (5) and is both more intensive and extensive than Arithmetic (5).

GRAMMAR AND COMPOSITION.

Grammar and Composition (1).—Grammar and Composition (1) is given in the first and second semesters of the elementary certificate course. The aim of this course is to give prospective teachers in the one-teacher schools as far as is possible within the time limits a thorough drill in the fundamentals of grammar and oral and written composition.

Grammar and Composition (2).—Composition (2) is given in the second semester of the first year of the advanced certificate course. The object of this course is to give prospective teachers in graded schools a thorough knowledge of such principles of grammar and such work in composition as will be helpful to them in teaching oral and written language in graded schools.

DRAWING, MUSIC AND PHYSICAL EDUCATION.

The different courses in drawing, music and physical education have many elements in common, but drawing, music and

physical education (1) and (2) as parts of the elementary certificate course have as their special object giving prospective teachers such knowledge and skill in these exercises as will be most helpful to them in teaching in one-teacher schools.

Drawing, music and physical education (3) and (4) as parts of the intermediate certificate course have as their special purpose the giving to prospective teachers such knowledge and skill in these exercises as will be most helpful to them in teaching graded schools.

Drawing, music and physical education (5) and (6) as parts of the advanced certificate course have the same object and purpose as the corresponding courses in the intermediate certificate course, but these courses in the advanced certificate course are carried on on a higher level and are both more intensive and extensive.

GEOGRAPHY.

Geography (1).—Geography (1) runs through the first year of the elementary certificate course. The aim of this course is to give prospective teachers knowledge of the principles of geography. Especial attention is given to the geography of North America, including the United States, of South America, and of Europe.

Geography (2).—Geography (2) is given in the first and second semesters of the second year of the intermediate certificate course. The object of this course is to give prospective teachers knowledge of the principles of geography. Particular attention is given to the geography of North America, including that of the United States, of South America, and of Europe.

Geography and History (3).—Geography and History (3) is given in the first semester of the second year of the intermediate certificate course. The object of this course is to give prospective teachers a knowledge of the materials of geography and history involved in teaching these subjects in graded schools; also, a knowledge of the methods, including observation, of teaching these subjects in such schools.

Geography (4).—Geography (4) runs through the first year of the advanced certificate course. The aims and purposes of this course are the same as those of geography (1) and (2), but the work is carried on on a higher level.

Geography and History (5).—Geography and History (5) is given in the first semester of the second year of the advanced certificate course. The aims and purposes of this course are the same as those of geography and history (3), but is carried on on a higher level and is both more intensive and extensive than geography (4).

READING.

Reading (1).—Reading (1) is given in the first and second semesters of the elementary certificate course. The object of this course is to give prospective teachers skill in oral and silent reading and to broaden their appreciation of good literature. Particular attention will be given to phonics, phrasing and emphasis.

Reading (2).—Reading (2) is given in the second semester of the second year of the elementary certificate course. The object of this course is to give prospective teachers a knowledge of reading materials involved in teaching reading in one-teacher schools; also a knowledge of the methods, including observation, of teaching reading in such schools.

Reading (3).—Reading (3) is given in the first semester of the first year of the intermediate certificate course. The aim of this course is to develop ability in oral and silent reading. Particular attention is given to phonics, phrasing and emphasis. While the object of this course is the same as reading (1) it is to be carried on on a higher level than reading (1), and the interpretation of literature through reading is given greater emphasis.

Reading (4).—Reading (4) is given in the second semester of the first year of the intermediate course. The aim of this course is to give prospective teachers a knowledge of the materials involved in teaching reading in graded schools; also a knowledge of the methods, including observation, of the teaching of reading in such schools.

Reading (5).—Reading (5) is given in the first semester of the first year of the advanced certificate course. The object of this course is the same as reading (1) and (2), but it is carried on on a higher level than reading (1) and (2); but as in reading (1) and (2) attention is given to phonics, phrasing, and emphasis, and especial attention is given to the interpretation of literature thru reading.

Reading (6).—Reading (6) is given in the second semester of the first year of the advanced certificate course. The aim of this course is the same as that of reading (4), but it is carried on on a higher level. Prospective teachers will be given a knowledge of the materials involved in teaching reading in graded schools; also, a knowledge of the methods, including observation, of teaching reading in such schools.

COURSES OF STUDY—OPPORTUNITY COURSES.

Opportunity classes for pupils who have completed the common school but who have not achieved full eighth grade standards will be maintained in the seventh and eighth grades. The course of study for these classes will be the prescribed state course of study for these grades including agriculture for boys and home economics for girls.

These classes will be in charge of experienced and competent teachers, and students will be advanced as rapidly as they are able to go forward.

No student will be admitted to these opportunity classes who is not sixteen years of age and who has not exhausted all home public school opportunities.

HIGH SCHOOL COURSES.

Two kinds of high school courses will be maintained, academic and vocational. The academic course is maintained for students who desire a liberal education; it follows the regulations governing such courses as prescribed by the State Board of Education. The vocational courses are maintained for those students who desire a general education beyond that provided by the common schools, and at the same time expect to prepare themselves for some definite vocation or trade. All vocational courses, with the exception of teacher-training courses, conform to federal and state standards giving such courses.

ACADEMIC COURSE.

The academic high school course is four years in length. To enter it, students must be fourteen years of age, must have completed the eighth grade of the common school, and must also have exhausted all home public high school opportunities.

In addition to the above requirements, all students in this course will be required to take from one to two periods per week in music and a like amount in physical education throughout the course.

AGRICULTURAL COURSE.

The agricultural course is a four year vocational course, subject to the federal and state standards governing such courses, and is designed to prepare students for practical farming. About three-fourths of the student's time is devoted to academic work and about one-fourth to agriculture; in addition, the student will be required to carry each year at least six months of practical work on the farm. To enter this course, students must be fourteen years of age, must have completed the eighth grade of the common school, and must also have exhausted all similar home public high school opportunities.

In addition to the above requirements, all students in this course will be required to take from one to two periods per week in music and a like amount in physical education.

TRADE COURSES.

Five trade courses are maintained; carpentry, masonry, stationary engineering, furniture repairing, and shoe repairing. These are vocational trade courses, subject to the federal and state regulations governing such courses, and are designed to prepare students to become skilled workers in these trades. With the exception of the course of shoe repairing, they are four years in length. One-half the student's time is devoted to academic studies and one-half to work in the trade which the student expects to follow. To enter these courses, students must be 14 years of age, and have, as a rule, completed the eighth grade of common school.

HISTORICAL OUTLINE

1886—General Assembly of Kentucky passed "an act to establish the State Normal School for Colored Persons." This act was approved by Governor J. Proctor Knott on the 18th day of May, 1886. The city of Frankfort, through its council, donated \$1,500.00 for the purchase of a site for the school. This site has since been known as "Normal Hill."

1887—Recitation Hall containing four rooms and a chapel was erected. John H. Jackson, A. M. (Berea College), was elected President. The school opened its doors on October 11 with three teachers. The school year closed with an enrollment of fifty-five students.

1888—The Faculty was increased to four members. The enrollment for the year was eighty-eight students.

1890—The Departments of Home Economics, Agriculture and Mechanics were organized. The Faculty was increased to six members. First commencement, a class of five was graduated.

1893—The preparatory, or High School Department was organized.

1894—A frame dormitory for girls (now Senior Girls' Home) was erected. The General Assembly gave the school the right to confer "State Diplomas" upon its graduates. These diplomas license the holders to teach in the public schools of Kentucky for life without examination.

1897—An addition of five rooms and a large chapel were made to Recitation Hall.

1898—President Jackson resigned. James E. Givens, A. B. (Harvard University), was elected President. A farm of 265 acres was purchased for agricultural purposes. A Printing Department was established.

1900—James S. Hathaway, A. M., M. D. (Berea College and Simmons University), was elected President.

1902—The name of the school was changed to "The Kentucky Normal and Industrial Institute for Colored Persons." The General Assembly appropriated \$15,000.00 to build a new dormitory for girls.

- 1906—Ladies' Hall (girls' dormitory) was completed and occupied. The Faculty was increased to ten members.
- 1907—A water system was installed.
President Hathaway resigned.
John H. Jackson, A. M., was again called to the presidency of the Institute.
- 1908—The General Assembly gave \$40,000.00 to the school for buildings and improvements.
The Model School was organized.
- 1909—Hume Hall and the Trades Building were erected.
- 1910—President Jackson resigned.
James S. Hathaway, A. M., M.D., re-elected President.
Steam and Electric Light Plants were put in operation.
- 1911—The Summer School was organized.
- 1912—President Hathaway resigned.
G. P. Russell, LL. D. (Berea College), elected President.
- 1917—Athletic Field was built.
- 1918—The Faculty was increased to eighteen members.
- 1919—The President's House was erected.
- 1920—The General Assembly appropriated \$21,000.00 for improvements in 1920 and \$21,000.00 for improvements in 1921, and \$25,000.00 for maintenance for 1920 and \$25,000.00 for maintenance in 1921.
The Smith-Hughes Vocational work was organized and began operating.
The Kentucky Normal and Industrial Institute was made a center for the rehabilitation of ex-service men.
Memorial Hall (boys' dormitory) was erected.
- 1921—Rosenwald School was built.
The Faculty was increased to twenty-eight members.
The industrial (trades) courses were strengthened.
- 1922—The General Assembly appropriated \$40,000.00 for maintenance in 1922 and \$40,000.00 for maintenance in 1923.
- 1923—F. M. Wood, A. M., Paris, Ky., State Supervisor of High Schools, elected President.
Nine additional teachers were added to the Faculty.

GENERAL INFORMATION

The Kentucky Normal and Industrial Institute was established by an act of the General Assembly in 1886, under the name of "State Normal School for Colored Persons," and is consequently a part of the public educational system of the state.

By an act of the General Assembly in 1902, the name of the school was changed from the "State Normal School for Colored Persons" to "The Kentucky Normal and Industrial Institute for Colored Persons," and the president of the institution was made an ex officio member of the Board of Trustees.

The attention of patrons and the general public is very carefully called to this change in the name of the institution. Its catalogues emphasize the change, and all matters of a business character pertaining to the institution are transacted under the above name, in keeping with the latest legislative enactment.

Location.—The Kentucky Normal and Industrial Institute is situated about three hundred feet beyond the city limits of Frankfort, on a beautiful hill overlooking the city. Its campus consists of about thirty-five acres of rolling land, beautifully studded with evergreen and deciduous shade trees. Its farm consists of two hundred sixty-five acres of choice bluegrass land, adjoining the campus.

The Louisville & Nashville Railroad, carrying not only its own trains, but those of the Chesapeake & Ohio Railroad Company, passes through this farm. The Kentucky Central Traction Company's lines also, with both its city and interurban cars, pass through the school's farm, skirting its campus, with stations at its entrance. Visitors coming to Frankfort over the interurban line may be set down at the gate of the institution by requesting the conductor to stop at "Station 73."

The Frankfort-Lexington turnpike passes between the campus and farm, forming the dividing line between them and on which entrances are located to both campus and farm.

DINING HALL—LADIES' DORMITORY

Sewerage.—The fortunate topography of both campus and farm greatly facilitates the matter of proper sewerage, therefore the school has a splendid sewerage system.

Water.—As in other cases just mentioned, the school is fortunate in its water supply. On the farm there are a dozen springs yielding pure clear water, from three of which water is piped to a reservoir and then pumped to a steel tank on the campus, for drinking and general use, and to fire hydrants properly placed, for the protection of all buildings. The purity of the water is attested by the fact that never has there been a case of typhoid fever developed here in the history of the school.

Light.—The campus and buildings are lighted by electricity from the school's power plant. A veritable network of are lamps dotting the campus makes it the pride of all by night, as well as by day.

Music.—This school emphasizes the teaching of public school music as a part of the educational development of its students. Opportunity for instrumental music is given on a private basis.

Military.—In keeping with the demand of the Federal Government, the school maintains a school of military science and tactics. The department is found to be very helpful in correcting habits of carelessness in carriage and bearing in the young men, greatly enhancing discipline in the school and simplifying and reducing the cost of clothing by requiring them to wear standard regulation uniforms.

Literary Societies.—Two literary societies are fostered for the development of the young men and women. The Jacksonian for the young men and the Phillis Wheatley for the young women, meet weekly and furnish excellent training in public speaking, parliamentary rules or usage and other literary work.

Religious Societies.—Realizing the great advantage of training the heart as well as the head and hands of its young men and women, thus awakening and quickening their sense of responsibility for their less fortunate fellows, a model, non-sectarian Sunday School, a Y. M. C. A. and a King's Daughters' Society are maintained in the school for the development

of their religious instincts. Aside from the Christian organizations, the school is opened with devotional exercises daily.

Athletics.—For the development of vigorous and rigorous physiques, and inspiring in young men and women a high sense of honor and fair play in the world's contest, an athletic association is maintained, fostering all school games and contests, and out-of-door exercises are encouraged among both sexes. As a result, the tennis court is the most popular resort on the campus for both boys and girls, and our strong teams of basketball and football have done much in the upbuilding of the institute.

SOCIAL INTERCOURSE.

Social intercourse, properly supervised, will be encouraged and emphasized in this institution. Socials and other forms of entertainment, calculated to develop the social side of life among the students, will receive special attention by the authorities of the Kentucky Normal & Industrial Institute.

LECTURES.

During the school year, students will be given opportunity to hear some of the most prominent and gifted speakers in Kentucky and in other states.

Health.—The school is careful to guard zealously its students' health, and is unsparing in its efforts to ward off all encroachment of diseases of any kind and has been remarkably successful in preserving the health of its student body. An annual fee of two dollars is charged, which guarantees each student medical attention from a competent physician.

BUILDINGS.

Recitation Hall.—The Recitation Hall of the institute is a substantial brick building of two stories and a tower, of a style of architecture which gives it the appearance from a distance of an old German castle. It contains the class rooms, the Dean's office and gymnasium.

Ladies' Hall.—Ladies' Hall is a commodious brick structure, four stories high including basement, and is heated by steam

HUME HALL—ADMINISTRATION BUILDING

and lighted by electricity. The laundry and ironing rooms are splendidly furnished with modern machinery, which does away with the labor of hand washing and ironing. The first floor contains the dining room, assembly room, lady principal's office, students' reception room, music rooms and the guest chamber.

On the second and third floors are the young ladies' dormitories. Ample toilets and bathrooms are provided on each floor. Three well placed stairways run from the bottom to the top of the building, providing ample means of exit in case of fire. The building is also well provided with fire hose and a modern metal fire escape for the protection of its inmates in the case of fire. Ample hot and cold water is provided for toilet purposes in the building. Indeed the young ladies are provided with all the ordinary comforts in this building.

Hume Hall.—Hume Hall contains offices for the President and his Secretary, and also for the Business Department. It houses the Library, Auditorium and the Departments of Domestic Science, Domestic Art, and Millinery. The building is a stone structure, modern in appearance, equipment and arrangement, and is well fitted for the purposes for which it is used. It is heated by steam and lighted by electricity. It is provided with a sanitary drinking fountain, toilets and fire escapes. The auditorium is provided with a stage especially adapted to the school dramas and operas. The teachers and students assemble in this auditorium daily for morning devotions and short talks by the President and members of the faculty.

Trades Building.—The Trades Building is a large two-story stone structure, with a basement in which the Department of Steam, Gasoline and Electrical Engineering is located. An electrical lighting plant furnishes lights for all buildings and for the campus lights. A central heating plant is also located in this basement, furnishing live steam for power and exhaust steam for heating the buildings.

The first floor of this building contains the Departments of Printing, Carpentry, Manual Training and Woodworking Machinery. It contains also the Trade Students' Drawing Room, supply room and a lumber room, as well as the Directors' office and office of High School Supervisor and Teacher Trainer of Agriculture.

TRADES BUILDING

The second floor contains the Agricultural Laboratory, the general drawing room, band room and armory. In the attic is the blue print room. The building is heated by steam and lighted by electricity.

Memorial Hall.—The boys' new dormitory, just completed, is a substantial three-story brick building, steam heated and electric lighted, and is well located and conveniently arranged for the comfort of young men.

The President's Residence was erected in 1918. It is located near the entrance to the school campus, and occupies a commanding view of the city of Frankfort, the institute farm and the surrounding country.

Cottages.—Besides these buildings there are several cottages on the grounds which are occupied by students and members of the faculty.

The Rosenwald School.—The generous donation of \$1,200.00 by Mr. Julius Rosenwald, of Chicago, supplemented by liberal contributions from the white and colored people of Frankfort, enabled the Trustees of the institute to erect a model rural school building, which serves the threefold purpose of a rural school, a practice school for teacher training, and a community center. The building is of brick, heated by furnace, and has ample cloak rooms. The Trustees of the institute have set apart four acres of valuable ground around the school building to be used as a playground and for school gardens.

EXPENSES 1923-24

Tuition to residents of Kentucky.....	Free
Residents of other states	\$6.00 per month
Board and room	\$15.00 per month
Matriculation	\$3.00 per year
Medical fee	\$2.00 per year
Lyceum fee	\$1.00 per year
Laboratory fee	\$1.00 per year
Incidentals	\$1.00 per year
Athletic fee	\$3.00 per year

All students who do not do their own laundering are expected to have their laundering done in the school laundry. The cost of laundering will average not more than \$1.50 per month.

SILO—K. N. AND I. I. FARM

In addition to the above expenses, every student is required to do an amount of manual labor equivalent to 1½ hours per day.

Payment of all bills is required in advance. No deductions are made from the monthly board bill, except in the case of protracted illness necessitating a student's absence from school for more than a week, or such other instances as may be agreed upon by the President.

Rooms are furnished with bedstead, springs, mattress, table, washstand, bowl and pitcher, looking glass, chair and electric light. All students have to provide their bed linen, covering, pillow, towels, etc.

The institution does not promise students the opportunity to work their way through school. A few pay part of their expenses by work as janitors or in the boarding department. These positions will, in all cases, be given to the most deserving. Young men who desire it can frequently find work on the institute farm, for which they will be paid the current wages for that class of labor. No one should come without **SOME MONEY**, expecting the institution to provide work for them by which they may meet their bills.

ADMISSION.

1. The institution is open to both sexes. All applicants for admission must possess good health, and furnish testimonials of a good character from reputable citizens in the community from which they come. Persons coming from other schools must furnish certificates of honorable dismissal.

2. At the time of matriculation the applicant must sign a written pledge that he will teach at least two years in the common schools of the state, or pay such tuition as the Board of Trustees may see fit to levy, in case he should later change his plans and not teach. Such pledge is not, however, required of those who matriculate for agriculture, mechanics or domestic science with a view to specialize in these subjects.

Registration.—1. All who come to enter the institute must report first to the Dean in his office in Recitation Hall for registration and assignment.

2. From the Dean's office the applicant goes to the Secretary's office for the payment of fees.

3. After the applicant has paid the required fees to the Secretary and has received receipts for the same he reports to the teachers of the classes to which he has been assigned for class enrollment.

Attendance and Discipline.—Regular attendance, faithful application to work and study and good deportment are required of every student. The aim of the institution is to make its students law-abiding, useful citizens of the Commonwealth.

One great barrier to good discipline and successful work is irregular attendance. We, therefore, urge upon our students the necessity of entering school at the beginning of the session, continuing till the close, and regular attendance upon class work, if they would obtain the best results from their connection with the institute.

The use of tobacco in any form, strong drink, the possession of firearms and instruments for gambling is strictly forbidden, and violators of this rule will be promptly and rigidly punished.

All students are required to attend chapel exercises daily. No student is allowed to leave the school grounds without permission.

Uniforms.—Students both male and female will be required to wear the regulated school uniform throughout the session. Uniform dress for young women, consisting of navy blue serge skirt and jacket, a black felt hat, will cost about \$30. Ordinary blue waists and skirts for everyday wear will cost about \$10 or \$12.

We suggest that all young women purchase this uniform after they arrive at the Institute as this will enable all to secure uniformity of material as well as uniformity of price.

Young men should consult the President before purchasing uniform.

All jewelry and other ornamental dress should be left at home.

Library.—A good library is necessary to the success of any institution, therefore we are endeavoring to secure such a library that will meet the needs of our students. To the number of good books already on hand we add year by year

such others as we may receive by donation or are able to purchase. Reading rooms are maintained in all the dormitories.

Laboratories.—Laboratories for experimental work in the various sciences will be available at the school. A fee of one dollar, mentioned elsewhere under expenses, is charged for use of laboratory equipment and unnecessary breakage.

SYSTEM OF RATING.

- A. Exceptional Standing.
- B. Good.
- C. Fair.
- D. Unsatisfactory.
- E. Failure.
- I. Incomplete.
- X. Absent from Examinations.

CREDITS.

Credits in Secondary Classes are recorded in "Units."

One "Unit" is given for five recitations per week, in any required or elective study, for a term of forty weeks.

College credits are recorded in semester hours. A semester hour is defined as a period of forty-five minutes in length, of one recitation per week, in any particular study, for a term of twenty weeks.

Two hours of Laboratory or Industrial work equal one hour of class work.

A recitation hour is a period of forty-five minutes in length, in the clear.

ACCREDITED SCHOOLS.

Accredited relations will be accorded to schools which have been inspected by the State Department of Education and which have been approved and recommended for accredited relation by the Accrediting Commission for the State of Kentucky.
